EMPATHY MAP

Automacially we will control and monitor the river water and Details of the water quality to be stored in the database

Use organic gardening techniques and avoid using pesticides and other herbicides

Reduce the river water pollution Prevent river water to get polluted

Says

Does

continuous tracking of water

Around 70% of industrial waste is dumped to water so Avoid large amounts of fertilizers dissolving in river water

become one

of the

cleanest

rivers in the

world

At least 2 billion people drink water from sources contaminated by feces.

Need modern technology to control and monitor the river t is our responsibility to take care of our society

> Create a clean river water everywhere

Detect the water quaility periodically

Check the acidity level of water

Most rivers, lakes and surface water in India are polluted due to industries, untreated sewage and solid wastes. Take a iummediate action if a river is polluted

> Reduce plastic usage

Avoid releasing harmful chemicals and oils into storm drains or rivers.

Feels

Avoid releasing construction waste into the river

Sewage or wastewater: The waste from households, factories, or agricultural land gets discharged into rivers

> Need public support and financial support from Government

Don't throw any solid waste into the water streams as it clogs the flow of water thereby leading to pollution
